Avian Workgroup

Meeting Summary

June 23, 1999

Current and Future Projects

- Avian Metrics Document under final NWCC "can live with it" review, to be released in September, 1999. Comments due by July 30.

Avian/Wind Energy Planning Meeting III Proceedings

Wind Energy/Bird Effects in Perspective

- Purpose: place mortalities from wind development in perspective with all avian mortality resulting from other causes.
- Paper will be a summary of literature on avian mortality.
  - Impacts are defined as causing direct mortality (i.e. not habitat loss).
  - Initial audience is NWCC.
- Tom Gray, Dick Anderson, Steve Ugoretz with support from A. Arnold will write up a scope of work and propose a consultant to Avian Workgroup. Work to be completed by September 30.

Wind Energy/Bird Interactions Fact Sheet

- 1-page fact sheet to be produced by September, 1999 (Tom Gray to author, Workgroup to review).
- What do we know/don't know about avian wind interaction?
- Organized by issue.
- Include information on different turbine types and habitat/terrain.
- 2nd page would have suggested reading.
- Regularly update with new information as research is concluded.

Assist with Permitting Handbook modification

Wind Energy/Bird Issues Workshop(s)/Forum(s)

- Summary of Fort Collins Avian Workshop to be ready by July, 1999.

Avian/Wind Energy Planning Meeting IV

- February/March 2000 is proposed for next workshop
- Next steps are to propose date to potentially interested participants, identify meeting site, and hold date.
Future of Avian Workgroup

- The Workgroup agreed that there is still relevant work to do and will continue to meet periodically, usually in conjunction with NWCC Business Meetings.
